A Brief Word From The CCCO

BY DR. TONY SUMMERS
CHIEF COMMUNITY COLLEGE
OFFICER

In the last week or so, you as a staff member of the Community College should have attended the Performance Management Information and S.M.A.R.T. Goal Clinic held by Darius Baker, Site Director, Patricia Roberts Harris Campus, and Jua Williams, Assistant Site Director, Bertie Backus Campus.

I encourage supervisors and employees to work together and think critically to create your S.M.A.R.T. goals as we continue to go into the 2018-2019 academic year. By establishing these goals, my hope is that this will provide cross-functional opportunities for managers/supervisors and employees to collaborate on high-performance expectations and to involve employees in the accomplishment of the Equity Imperative. Your work and engagement will have positive impacts on the community and the University. The result of your efforts will also greatly benefit the students we serve.

"Education is the most powerful weapon which you can use to change the world."
-Nelson Mandela

WHAT ARE S.M.A.R.T. GOALS?

SPECIFIC:

- Specific goals are clear and state "what" the employee needs to accomplish.
- Specific goals should be simply written and clearly define what will be accomplished.
- Specific is the What, Why, and How.

MEASURABLE:

- Measurable goals provide evidence that goals have been accomplished or not. Usually, the goal statement is a measure for the project, but there can also be several short-term or smaller measurements built into the goal.
- Measurable goals define the objective with a definite level of precision. Measures should be credible and quantitative and may also be qualitative in nature, i.e. levels of service; timeliness.

S - Specific
M - Measurable
A - Attainable
R - Realistic
T - Time-Related

ATTAINABLE:

- Attainable goals can be challenging, but they must be practical and achievable.
- Employees must possess the appropriate knowledge, skills, and abilities needed to achieve the goal.
- Employees can achieve almost any goal if the goal is thoughtfully planned and a time frame is established that allows the employee to execute various tasks that will yield specific results.
- Achievable goals motivate employees. Impossible goals frustrate and demotivate them.

TIME-RELATED:

- Time-related goals should be linked to time frames that creates a practical sense of urgency.
- Time-related goals include a deadline and milestones for completion. They may also include checkpoints along the way.

REALISTIC:

- Realistic goals should measure outcomes, not activities.
- Goals should be prioritized in terms of importance, and employees should be aware of which goals are most important.

MINUTES -- BOARD OF TRUSTEES MEETING WEDNESDAY, SEPTEMBER 26, 2018

Photo Courtesy of udc.edu

Please find below a summary of actions taken and items discussed during the most recent meeting of the full Board of Trustees. ***The next meeting of the full Board of Trustees is scheduled for November 7, 2018.***

- President Mason's contract was amended, extending his presidency for another five years. BOT Chairman Christopher Bell said the action should indicate internally and externally how much the Board values the president's leadership and accomplishments, and more specifically, his Equity Imperative strategic plan for the future. President Mason remarked that while the president gets all the accolades, his team does all the work.
- A resolution was passed approving a 3% cost of living salary increase, retroactive to October 1, 2017, for non-union employees.
- A resolution was passed raising tuition rates by 2.5 % for the 2019-2020 academic year, an action Chairman Bell said was not easy to take. He added, however, that UDC is committed to ensuring students get a "proper return on their investment, because dollars are hard to find."
- A resolution was passed revising the tuition remission program to include "for-credit" courses at UDC for regular full-time faculty, staff, retirees, and their spouses and dependent children; and to make it compliant with the Internal Revenue Code.
- The Board passed a resolution incorporating a supplemental \$9.7 million award from D.C. Mayor Muriel Bowser into UDC's budget.
- Student Trustee Sandra Nkamgna spoke of the importance of students' trust in her and their willingness to share concerns about University operations so problems can be identified and addressed.
- Dr. Arlene King-Berry, chair of UDC's Faculty Senate, asked that the Board consider adding a faculty member as a non-voting member of the Board of Trustees.
- The UDC Board of Trustees appointed Mike Goldstein, Senior Counsel at Cooley LLP, to serve as a member of the UDC Foundation's Board of Directors.

Community College Committee. Dr. Summers spoke about the Community College at the Academic and Student Affairs Committee meeting. He reported on several items including a grant in the form of an MOU from OSSE for the aviation program which enabled them to create a digital learning environment. Two aviation students received full scholarships from Royal Airlines which covered travel to London for the students to attend an aviation conference. He also discussed the sixteen week continuing education non-credit English as a Second Language course; the Late Start fall semester which has seventy-five students enrolled at the Bertie Backus campus; the summer Math pilot program; and hiring a new testing coordinator.

WHO'S LISTENING?

By Pamela "P.S". Perkins
Behavioral Communication Specialist
Adjunct Professor, Speech Communication

Any individual who has spent time with me in class or training, knows that during sessions I sometimes instinctively blurt out "WHO'S LISTENING?" Usually, 99.9 percent of the audience becomes alert and some have even spontaneously responded "WE ARE" on behalf of everyone! But the question remains: WHO'S LISTENING?

Intrapersonal communication, or "self-talk," is the number one deterrent to listening to others. Our "mental chatter" occupies our mind throughout the communication/listening day! You talk to yourself more than you communicate with anyone! Communication can be defined as: "Happening whenever meaning is assigned to behavior or the residue of behavior." Notice some important facts about this science: (1) Everything that happens is communication, and communication is everything that happens; (2) the term behavior is used to include verbal and nonverbal behaviors; and (3) residue refers to our mental thoughts and our resultant perception. "We are all residents of our residue!"

It is very difficult to invade the mental residue of others and to turn down the volume of our own residue. Most arguments (if not all) are the result of one or more individuals fighting to protect their "residue" over the "residue" of another. How many times during an interpersonal exchange have you said or heard someone say, "YOU ARE NOT LISTENING!" What they too often mean is, "YOU ARE NOT AGREEING WITH ME!" Listening and agreeing are not synonymous, but to protect the ego, we often insist that they are.

As leaders, instructors, civil servants, parents, service providers, family members, humans...how can we all get along without the skill of listening? Answer: We cannot! Solution: Understand no two individuals share the exact same residue! Make room for the other's reality by turning down the volume of your internal noise and understand that perception is personal. We can improve our communication climates at work and home by turning our hearing experiences into listening experiences designed to support those around us and achieve our common goals!
